

## Guidelines

### *Avoid Common Mistakes*

- Don't include too much information
- Don't use a font smaller than 11 point
- Make sure your scientific message is legible and clearly stated.
- Please remember that by submitting a poster abstract, you are agreeing to be present during the poster session to share your finding and interact with attendees.

### *Poster Content*

The poster display should focus on the following topics/content:

- Title
- Introduction or background – Your introduction or background information should contain 3-5 short sentences outlining information necessary to understand the study and by it was done.
- Hypothesis , Objective or Aim – The aims of the study, the questions to be asked or the hypothesis to be tested should be clearly stated in as few words as possible.
- Methods – Outline your methods briefly. Provide details only for new methods or important modifications of older ones.
- Conclusion, Results or Outcomes – The conclusion(s) should be succinctly stated in large type. Many viewers read this first, so it should be easy to understand.
- References – Pertinent references should only be considered for the abstract and may be presented in a smaller font.
- Acknowledgements or Contact – Acknowledgements should be limited to granting agencies for the abstract.

### *Poster Design*

The design of an effective poster is a demonstration of your ability to communicate your research results. A good poster requires considerable forethought and attention to detail.

- Avoid putting too much material on the poster.
- The poster title and headings should have letters that are large enough to be read at a distance.
- Mounting sections on colored paper may improve the graphic impact of your presentation. Avoid color combinations that are difficult to read.
- [www.posterpresentations.com](http://www.posterpresentations.com) offers a free and easy to use template that many have utilized in prior years. You can also print your poster at a very economical cost at this site. (Approximately \$55 for the professional version.)
